SUSHRUTH DANIVASA SRIDHAR

(414)-629-3242 | dssushruth2000@gmail.com | LinkedIn | GitHub

EDUCATION

University of Wisconsin – Milwaukee, Master of Science in Computer Science, GPA: 3.78 September 2023 - May 2025

SKILLS

Programming Languages: Python, JavaScript, C, C++, Java
DevOps and Cloud: Azure, Amazon Web Services (AWS) (EC2, Lambda), Google Cloud Platform (GCP)
Containerization and Deployment: Docker, Kubernetes, CI/CD pipelines
Web Technologies: HTML5, CSS3, React, Django, Flask, REST APIs
Databases: MySQL, PostgreSQL, MongoDB, SQL, NOSQL
Software Development: Embedded Systems, Software Testing, Agile Development, Version Control (Git, GitHub)
Coursework: Machine Learning, Natural Language Processing, Image Processing, Cloud Computing, Immersive 3D, Data Structures and Algorithms

Work Experience

Software Analyst, KPMG August 2022 – July 2023

- Spearheaded the migration of 10+ applications to **Microsoft Azure**, utilizing **Azure Databricks** to improve **scalability, reliability, and cost efficiency**, resulting in a **15% increase in system performance**.
- Developed and implemented **AI driven cloud solutions** in collaboration with cross-functional teams, leveraging **PostgreSQL databases** to improve **data storage, retrieval, and management efficiency**.
- Automated deployment processes by implementing **CI/CD pipelines**, reducing **deployment time by 40%** and minimizing manual effort in production releases.

Software Developer Intern, WIPRO March 2022 – May 2022

- Implemented backend solutions in **Java** and **MongoDB**, contributing to scalable and efficient application architecture.
- Enhanced professional skills in **JavaScript** and **Machine Learning**, leading to a **10% increase** in team productivity and efficiency through practical, hands-on experience.

Project Experience

Traffic Sign Recognition December 2024

- Built and trained a **deep learning**-based model for traffic sign classification using **Convolutional Neural Networks** (CNNs) to enhance autonomous driving and ADAS. Trained on the **German Traffic Sign Recognition Benchmark (GTSRB)** dataset, consisting of **50,000+ images** across **40+ classes**, simulating real-world traffic conditions.
- Achieved high classification accuracy, with the best model attaining **98.52% test accuracy** and near-perfect AUC scores.

Multiplayer Tic-Tac-Toe April 2024

- Constructed a web-based Tic-Tac-Toe game utilizing **HTML**, **CSS**, and **JavaScript**, enabling two players to dynamically interact with a 3x3 grid of "X" and "O" marks.
- Engineered interactive features, including turn indicators, game outcome announcements, and a restart button, enhancing user interface functionality and increasing player engagement by 30%.

Smart Metering System July 2022

- Engineered an **IoT-based smart energy meter** with **Arduino and Blynk IoT**, enabling **real-time electricity tracking** and **remote-control functionalities**, resulting in a **20% reduction in electricity consumption**.
- Improved energy efficiency and sustainability by providing precise bill estimates and detailed insights into consumption patterns, reducing billing **errors by 10%**.

ELIXIR March 2022

- Created **ELIXIR**, an e-commerce platform offering a wide selection of gaming accessories tailored for gaming enthusiasts. Enhanced the shopping experience by developing a **user-friendly interface** using **Python, HTML, CSS, and Flask**, driving a **30% increase** in user engagement and improving navigation for gamers**.**

Courses & Certifications

- Associate Cloud Engineer, Google October 2022
- Artificial intelligence, Verzeo July 2021
- Build a Face Recognition Application using Python, Guvi May 2021

Publications

Smart Metering System, IJRESM April 2022

- Published a paper detailing the development and implementation of a smart energy meter using IoT
